1. Claims 1-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 09/21/06.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 21-26 and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buxton Jr. in view of Martinmaas. Buxton discloses most of the elements of the claims including a wedge (wedge shaped movable jaw face 17 as described in column 2, for example). However, Buxton lacks an adjustable jaw and may lack the claimed zigzag gripping surface of the stationary jaw (however note notch 14 on which the zigzag surface could arguably be read). On the other hand Martinmaas is cited to show the use of a wedge (see slide member 34) on a movable jaw of a wrench. Additionally, zigzag gripping surfaces are conventional in the relevant art. Accordingly, it would have been obvious in view of Martinmaas and the relevant knowledge in the art to provide the wrench of Buxton with the missing elements for the purpose of improving its utility. Elements of some dependent claims not specifically shown in the references, but per se conventional, would also have been obvious to provide to the device of Buxton, for the same reason as noted above.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3723

5. Claims 28 and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The limitation "the plate" lacks antecedent basis, making all of the elements claimed impossible to determine.

6. Claim 27 is objected to as being dependent on a rejected claim, and would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob K. Ackun Jr. whose telephone number is (571)272-4418. The examiner can normally be reached on Monday through Friday 8.30AM-5.00PM.
